A document states what it contains before anything reads it. The structure of a page is separate from the words printed on it. Where a figure sits is a fact about the page and not about its meaning. A measurement recorded without its method is a nu
Content that was seen and not converted is a gap, not an absence. The cheapest correct answer is still the correct answer.
Reading order is a claim about intent and should be labelled as one. An identifier that repeats is an identifier that cannot be
